CAREER OBJECTIVE

MCA student with real-world internship experience in web development. Proficient in HTML5, CSS3, and JavaScript (ES6+), with hands-on exposure to React.js, Node.js, and MySQL. Skilled in building responsive interfaces and delivering client-ready web solutions.

TECHNICAL SKILLS

Core: HTML5, CSS3, JavaScript, jQuery, WordPress

Backend: Node.js, Express.js, REST APIs

Version Control: Git, GitHub

Operating Systems: Windows

Frontend: React.js, Responsive Web Design, Bootstrap

Databases: MySQL, MongoDB

Tools: VS Code, Visual Studio, Elementor

SEO: Yoast SEO, On-Page SEO

WORK EXPERIENCE (INTERNSHIP)

Beyonli Services

Web Development Intern

June 2025 – September 2025

Pune, Maharashtra

Project: GaiAai Foundation Website

Duration: July 2025 – September 2025

Domain: Non-Profit / Donation Platform

Tech Stack: WordPress, Astra Theme, Contact Form Plugins, Yoast SEO

- Developed a donation-focused website for a non-profit organization with emphasis on clarity and ease of navigation.
- Used SEO tools and structured content layout to increase visibility and engagement.
- Ensured mobile responsiveness and accessibility across devices and browsers.
- Integrated contact and inquiry forms to facilitate user communication and support.

Project: Beyonli Services Company Website

Duration: June 2025 – July 2025

Domain: Business Website Development

Tech Stack: WordPress, Elementor, SEO Tools, Performance Plugins

- Designed and developed a fully responsive business website using WordPress and Elementor, ensuring consistent rendering across desktop and mobile.
- Optimized images, plugins, and page layout to improve load time and SEO ranking across search engines.
- Customized user interface and content flow to align with business goals and improve user experience.
- Collaborated with the client to understand real-time requirements and provided tailored web solutions.

PROJECTS

Full-Stack Food Order Tracker

- Built a real-time food tracking application using the MERN stack (MongoDB, Express, React, and Node.js).
- Implemented automated system logic using JavaScript timers to simulate a live order lifecycle, automatically transitioning order states from "Preparing" to "Delivered."
- Developed a dynamic Admin Dashboard featuring data aggregation for total order counts and real-time status tracking (Pending vs. Delivered).
